

## Learning to see through turbulent water

**Task1:** Download and Read paper from the given link

<https://ieeexplore.ieee.org/abstract/document/8354166>

**Task2:** Download the pre-trained model from the given link and run the code. <https://github.com/zmurez/TurbulentWater>

**Task3:** Re-produce the results using the pre-trained model on the test set of the dataset.

Submit the instruction file containing the step by step command you have run to re-produce the results and attach the screenshots for the processing and accuracy of the pre-trained network.
